Experience

FactWise

May 2025 – Present

Associate Product Manager

Mumbai, India

- Shipped **20+ features** end-to-end (PRD to deployment) including **2 full-stack products** – personally built with AI tools (Claude Code), deployed to Azure, and resolved production bugs across the live B2B procurement platform.
- Built AI-powered **Invoice OCR system** (FastAPI, React, Azure Document Intelligence) with confidence scoring and multi-level approval workflows; cut client invoice processing from **manual hours to under 2 minutes**, reducing manual work by **90%**.
- Designed **BOM Data Mapper** with visual column mapping, fuzzy matching, PDF zone extraction, and reusable templates; validated with enterprise client who confirmed **60% efficiency gain**, valued at **INR 10–12L/year** per deployment.
- Rebuilt broken **RFQ Analytics** module – the most critical dashboard in the platform – into a production-stable system aggregating vendor bids, landed costs, and real-time analytics; now used actively by **multiple enterprise clients**.
- Lead and mentor a **team of 2 AI PMs**; define AI roadmap including FactWise 4.0 rebuild, review PRDs, and assign AI automation tasks across the product.

Action Labs

Apr 2024 – Dec 2024

Product Management Intern

Mumbai, India

- Designed end-to-end notification system for **Ingram Micro** (Fortune 500, **\$50B+ revenue**) covering all user types – vendors, buyers, admins – delivering complete PRD with user flows and high-fidelity **Figma prototypes**.
- Reported directly to **Senior Director of Delivery**; learned PRD writing, feature prioritization frameworks, and stakeholder management in a corporate product environment.

CryptoTax International Pvt. Ltd.

2021 – Present

Product Manager (Part-Time)

Mumbai, India

- Joined as **founding team member** during COVID; learned manual crypto gain/loss calculations, then automated the entire pipeline – reducing computation for **10K+ transactions from 4–5 days to under 10 minutes** using Python (openpyxl).
- Built scalable systems handling **20K+ Excel rows** per client during tax season at **98–99% accuracy**; eliminated need for additional hires and scaled from 2 people to a full team across multiple tax seasons.
- Currently lead **2 teams**: internal automation (1 Python dev) and web app development (3 contract devs); defined MVP features, UI/UX, and product roadmap for consumer-facing crypto tax platform.

Projects

[Link](#)

AI-Powered Interview Avatar

[Link](#)

D-ID, AWS, Python | Conducted **100+ mock interviews** and cut evaluation time by **30%** through an AI-driven avatar offering automated, personalized feedback for PM interview practice.

Sales Call Analyzer

[Link](#)

Python, AWS | Processed **500+ monthly sales calls** by automating transcription and sentiment tracking, helping teams identify conversion patterns for better performance reviews.

Technical Skills

Analytics: SQL, Python, Excel, Tableau, Data Visualization

Product: PRDs, User Flows, Roadmapping, UI/UX Design, Figma, A/B Testing, Agile/Scrum, Jira

Development: AI-Assisted Dev (Claude Code), FastAPI, React, TypeScript, Azure (Blob, OCR, App Service), Docker, AWS, PostgreSQL

Education

NMIMS University

Bachelor of Technology in Computer Engineering

Mumbai, India

GPA: 8.65/10 | **Coursework:** Data Structures, DBMS, Machine Learning, Reinforcement Learning, Statistics, AI

Leadership / Extracurricular Activities

- Selected for **Shravan Tickoo's cohort** on Mastering Product Management, out of **550+ applicants**.
- Won **Productathon** by leading a team that reduced peer workloads by **90%**; placed **2nd in VC pitch** competition with a market-ready product concept.
- Lead Placement Coordinator** for B.Tech Computer students; represented NMIMS at inter-state recruitment drives.
