Kartik Daswani

Associate Product Manager | Shipped 20+ Features & 2 Full
Products | PM Who Codes and Ships
Mumbai, Maharashtra, India

Summary

As an APM at FactWise, I've shipped 20+ features end to end, PRD to production, including 2 full stack products I built myself using AI coding tools and deployed to Azure. One of them cut client invoice processing from manual hours to under 2 minutes. I'm a CS engineer who happens to love product. I write PRDs AND push code. I design features AND fix production bugs. Most PMs hand off a spec and wait. I ship it, deploy it, and debug it in production. Before FactWise:• Designed a notification system for Ingram Micro (Fortune 500, \$50B + revenue) as a Product Intern at Accion Labs. Complete PRD, user flows, and Figma prototypes delivered to Senior Director of Delivery. • Joined CryptoTax International during COVID at 18. Automated their entire tax calculation pipeline using Python. Reduced computation for 10K+ transactions from 4 to 5 days to under 10 minutes. Still there part time, now leading 2 teams (4 devs reporting to me). What I bring to the table:• Built AI powered Invoice OCR (FastAPI, React, Azure Document Intelligence). Reduced manual work by 90%• Designed BOM Data Mapper with fuzzy matching and PDF zone extraction. Validated at 60% efficiency gain, valued at INR 10 to 12L/year per deployment• Rebuilt broken RFQ Analytics, the most critical dashboard in the platform, into a production stable system used by multiple enterprise clients• Lead and mentor a team of 2 AI PMs; define AI roadmap for FactWise 4.0 I'm looking for product roles where I can own outcomes end to end, discovery through delivery. If your team needs a PM who can actually ship, not just strategize, reach me at kartikdaswani07@gmail.com. Specialties: Product Management, Product Strategy, User Research, Data Analysis, PRDs, User Flows, Roadmapping, Stakeholder Management, Agile/Scrum, A/B Testing, SQL, Python, React, TypeScript, FastAPI, Azure, Docker, Figma, AI Assisted Development

Experience

FactWise

Associate Product Manager

May 2025 - Present (1 year 2 months)

Mumbai, Maharashtra, India

- Shipped 20+ features end to end (PRD to deployment) including 2 full stack products personally built with AI tools (Claude Code), deployed to Azure, and resolved production bugs across the live B2B procurement platform.
- Built AI powered Invoice OCR system (FastAPI, React, Azure Document Intelligence) with confidence scoring and multi level approval workflows. Cut client invoice processing from manual hours to under 2 minutes, reducing manual work by 90%.
- Designed BOM Data Mapper with visual column mapping, fuzzy matching, PDF zone extraction, and reusable templates. Validated with enterprise client who confirmed 60% efficiency gain, valued at INR 10 to 12L/year per deployment.
- Rebuilt broken RFQ Analytics module, the most critical dashboard in the platform, into a production stable system aggregating vendor bids, landed costs, and real time analytics. Now used actively by multiple enterprise clients.
- Lead and mentor a team of 2 AI PMs. Define AI roadmap including FactWise 4.0 rebuild, review PRDs, and assign AI automation tasks across the product.

CryptoTax International Pvt. Ltd.

4 years 5 months

Product Manager

April 2023 - Present (3 years 3 months)

India

- Lead 2 teams: internal automation (1 Python developer) and web app development (2 contract developers). Define MVP features, UI/UX, and product roadmap for the consumer facing crypto tax platform.
- Built scalable systems handling 20K+ Excel rows per client during tax season at 98 to 99% accuracy. Eliminated the need for additional hires and scaled operations from 2 people to a full team across multiple tax seasons.

- Own end to end product strategy including feature prioritization, user flows, and stakeholder alignment for a platform serving individual and enterprise crypto tax clients.

Software Associate and Administrator

October 2022 - April 2023 (7 months)

United States

- Led a team of 1 developer to build automated tax calculation pipelines using Python (openpyxl). Reduced computation for 10K+ transactions from 4 to 5 days to under 10 minutes.
- Replaced manual Excel workflows with automated systems, cutting operational costs and eliminating the need for seasonal hires.
- Deployed crypto tax software on AWS, ensuring reliable performance during peak tax season load.

Junior Associate

February 2022 - October 2022 (9 months)

United States

- Joined as the first team member during COVID at age 18. Learned manual crypto gain/loss calculations from scratch, processing client portfolios in Excel.
- Developed deep domain expertise in cryptocurrency taxation, blockchain transaction tracking, and compliance requirements across multiple jurisdictions.

Accion Labs

Product Intern

May 2024 - January 2025 (9 months)

Mumbai, Maharashtra, India

- Designed end to end notification system for Ingram Micro (Fortune 500, \$50B + revenue) covering all user types: vendors, buyers, and admins. Delivered complete PRD with user flows and high fidelity Figma prototypes.
- Reported directly to Senior Director of Delivery. Learned PRD writing, feature prioritization frameworks (RICE, MoSCoW), and stakeholder management in a corporate product environment.

- Collaborated with cross functional teams including engineering, design, and QA to define notification triggers, delivery channels, and escalation logic across the platform.

Kenmark ITan Solutions

Web3 Developer

December 2022 - April 2023 (5 months)

Goregaon, Maharashtra, India

- Built Melo Coin, a reward based crypto token, and Melo Faucet, a platform that incentivizes user engagement and community growth. Handled end to end development from token design to deployment.
- Developed an automated NFT minting system for Melo music artists, converting album artwork into NFTs to create a new revenue stream for creators.
